SUMMARY

Data Analyst with an MSc in Business Informatics from Riga Technical University and 2+ years of experience turning operational data into monthly management reporting and dashboards at an automotive dealership. Uses SQL, Python, Excel and Power BI for data analysis, and business analysis methods (requirements gathering, process mapping, KPI design) to turn findings into decisions. Recent projects cover churn analysis, RFM customer segmentation and A/B test design on datasets of up to 2 million records.

SKILLS

- Data analysis: SQL (PostgreSQL, DuckDB), Python (pandas, NumPy, Matplotlib), Microsoft Excel (pivot tables, formulas, business cases), statistical testing, logistic regression, data cleaning and validation
- Business intelligence: Microsoft Power BI, DAX, data modelling (star schema), dashboards, KPI reporting, data visualization
- Analytics methods: churn analysis, RFM customer segmentation, customer analysis, A/B test design, model benchmarking
- Business analysis: requirements gathering, user stories, acceptance criteria, MoSCoW, as-is/to-be process mapping, RACI, stakeholder analysis, business cases
- Systems: TVS Dealer Management System (DMS), Tally ERP, SAP Analytics Cloud (beginner), Jupyter, Git/GitHub

PROFESSIONAL EXPERIENCE

Data and Business Analyst, Harshad Auto Pvt Ltd Sep 2023 – Dec 2025
Authorised TVS Motor Company dealership and parts stockist, Trivandrum, India | On-site; remote from Aug 2024

- Delivered monthly management reports to the owner covering four business areas (three-wheeler enquiries and sales, service, parts and accounts) by extracting operational data from the TVS DMS and analysing it in Excel and Power BI.
- Built and maintained Power BI and Excel dashboards tracking enquiries, vehicle sales, service jobs, parts sales to regular retailers and outstanding payments, giving the owner one monthly view of dealership performance.
- Cleaned and validated DMS exports for enquiries, sales, service and parts transactions before reporting, so monthly figures were consistent across departments.
- Presented findings and business improvement ideas to the owner in monthly reviews, and continued the full reporting cycle remotely from Aug 2024 while completing an MSc in Riga.

Accounts and Data Assistant (Part-time), A & A Enterprises, Inc. Jun 2021 – Aug 2022
India

- Maintained sales, transaction and inventory records in Tally ERP and Microsoft Excel, keeping financial records accurate and ready for reconciliation.
- Reviewed and tracked business data in Excel to flag missing or inconsistent entries before month-end reporting.

PROJECTS

KKBox Subscriber Churn Analysis | Python, SQL, Excel, Power BI 2026
Independent project on public data

- Identified that manual-renew subscribers churned at 41.6% vs 4.4% on auto-renew in a 7,500-subscriber sample, by building a leakage-safe dataset and testing churn drivers with statistical tests and logistic regression.
- Showed a one-line targeting rule matched a churn model (ROC-AUC 0.82) at the same contact budget, and recommended the simpler rule.
- Designed a randomised A/B pilot (1,491 customers per arm, guardrails, stop rule) with a costed Excel business case, RACI, process maps and requirements with acceptance criteria.

AI Adoption and Workforce Planning | Python, DuckDB SQL, Power BI 2026
Independent project on public data

- Narrowed 336 eligible tasks to 3 AI pilot candidates by joining published Anthropic Economic Index aggregates (about 2 million interactions) to 974 O*NET occupations and ranking them with a scored SQL model.
- Validated the pipeline with 12 reconciliation checks and delivered a four-page Power BI dashboard (star schema, DAX) with MoSCoW requirements, user stories and a traceability matrix.

Olist E-commerce Sales and Customer Analysis | PostgreSQL, Python, Power BI 2026
Independent project on public data

- Analysed R$15.42M in realised sales across about 96,000 delivered orders, finding an 8.11% late-delivery rate and lower review scores for late orders.
- Measured a 3.00% repeat-customer rate, segmented customers with RFM analysis and built a four-page Power BI report on a multi-table data model.

MSc Thesis: Smart Contract Portability | Python, Solidity, Go 2026

- Designed a Universal Intermediate Representation and Python prototype translating Ethereum Solidity contracts into Hyperledger Fabric Go chaincode; 6 of 14 feature categories fully represented and all 3 generated test chaincodes compiled.

EDUCATION

MSc, Business Informatics, Riga Technical University, Latvia Sep 2024 – Jun 2026

B.Com, Computer Applications, Kristu Jyoti College of Management & Technology Sep 2021 – Mar 2023

CERTIFICATIONS

- Business Analytics (Data Analysis, Machine Learning, Data Science), Riga Technical University, 2026
- Professional Diploma in Python and Data Science, IPCS Global, 2024
- Exploring SAP Analytics Cloud, SAP Learning, 2026
